

Origins: My Life by the Numbers

Name: _____ Per: _____

Directions for "My Life by the Numbers":

Here are the recommended steps for completing the rough draft (rough draft being the graphic organizer on the opposite side of the paper). Other directions and info will be posted on our website, as well as what to do for your final Infographic.

Step 1: Choose 10 things about you that can be related in numbers.

ie. 12 pet fish, 2 siblings, 22 medals, 13 hours of sleep a night, 450 minutes spent playing pokemon a week, 50% French and 50% American etc...

Write these things in each of the boxes. See step 1 posted on the website--complete with all 10 boxes (10 facts total! I only did 5 to model...the rest are a surprise...)

Step 2: Write your name in the center starburst! Then, write a two-step (or more! You know how to do this after our Building and Solving Equations Lesson!) equation whose result/answer/solution is the number you have chosen. Challenge yourself!

A two-step equation includes either addition/subtraction AND multiplication/division. Show how you solved for x. Box your answer. See step 2 posted on the website.

Step 3: Double check your work! You are being graded on completeness and correctness. Make sure all 10 are done! Graphics not necessary on rough draft, though you could use this space to plan it out.

Due Date:

Odd Periods: Tuesday, September 4

Even Periods: Wednesday, September 5
