

MY MATH HISTORY

I would like to know all about your math history. Think about the following prompts and answer all of the questions below in a letter to Ms. Cori. It needs to be on a separate sheet of paper, with the proper heading at the top. Please write in full, complete sentences, using proper punctuation and all the parts of a letter. It may be neatly written or typed and printed. If you write on this paper, you will receive a 50% and be asked to redo it.

- Who were your previous math teachers?
- What did they do to make math easy?
- What did they do to make math fun?
- What do you remember most about math?
- What is the easiest thing about math?
- What is the most difficult thing about math?
- How do you feel about math?
- What do you expect to learn this year?
- How do you learn math best?
- Do you think math is important? Why or why not?
